

Job Description: **Field Application Engineer - CDI**

At Abbelight we are driven to advance biological and biomedical research by making powerful super-resolution microscopy easy and accessible for all users. Together with researchers, biotech labs and medical facilities, we aim to unlock the next generation of imaging tools to understand biology and help improve human health.

We are looking for a field application engineer who will be key in assisting our customers and collaborators fully exploit our products and services, as well as informing R&D about customer pain points and needs.

THE ROLE

As a field application engineer, you have one primary focus: training and accompanying users of Abbelight's tools to ensure they obtain the best possible results. You will be working side-by-side with customers to optimize imaging protocols, develop new analysis workflows, and perform state-of-the-art nanoscale imaging on a daily basis. Some of your missions include to:

- **Work on-site with select customers and collaborators** to facilitate single molecule imaging, develop analysis workflows and uncover customer pain points.
- **Collaborate closely with the applications team** to understand and prioritize these needs.
- Inform R&D decisions to quickly **improve our products and services**.

REQUIRED PROFILE / SKILLS

- **MSc/MEng** or equivalent (**BAC+5**) in biology, microscopy, or similar **life science field**. PhD is a plus.
- A passion for working closely with collaborators and a knack for problem solving.
- Excellent communication skills and efficiency in working remotely in a team.
- **Willingness to travel domestically and internationally >50%**.
- Experience with microscope tools and image analysis software is a big plus.

WHY ABBELIGHT / WHAT WE OFFER

TEAM A passionate, multidisciplinary, multicultural and quickly growing team, based just outside of Paris.

STABILITY Permanent position (CDI) with health benefits, and the French work-life balance.

EVOLUTION The role flexible and can evolve in multiple directions as the company grows, including the possibility to assume managerial responsibilities to train and integrate more junior team members.

HOW TO APPLY

Send your CV and a brief explanation of *why this job is a good fit for you* to cbutler@abbelight.com.

ABOUT ABBELIGHT

Founded in 2016, abbelight is a fast-growing start-up specialized in super-resolution fluorescence microscopy, specifically Single Molecule Localization Microscopy (SMLM). The technology developed by abbelight is based on three areas of expertise: chemistry, optics and computer science. The products developed integrate a constantly evolving know-how and allow abbelight to offer a complete solution, from sample preparation to data analysis, including modular instrumentation that can be adapted to customers' needs.
