

Job Description: **Quality Engineer (Junior) - CDI**

At Abbelight we are driven to advance biological and biomedical research by making powerful super-resolution microscopy easy and accessible for all users. Together with researchers, biotech labs and medical facilities, we aim to unlock the next generation of imaging tools to understand biology and help improve human health.

We are looking for a junior quality engineer to spearhead our quality assurance and regulatory affairs. You will be the "owner" of all things quality-related, working closely with senior regulatory consultants to design and implement a quality program at abbelight,

THE ROLE

You will be responsible for ensuring that our products are **reliable, standardized, and respect the appropriate regulatory norms**. You will work with all the various divisions of the company, from software and hardware R&D to production and customer service, to improve our existing products and provide guidance on the product roadmap.

Some of your missions will be to:

- **Implement** and manage the company's quality program - ensure compliance & inspection readiness
- Identify, implement & maintain the **QMS** for design & manufacturing of instrumentation and reagents.
- Develop, implement and maintain **training** programs for staff.
- Maintain **GDPR** compliance and provide input on software and data structure.
- Work closely with a group of **senior-level consultants** when necessary.
- Work primarily **on site** in our office just outside of Paris, with flexibility for **remote** work as necessary (minimum 20%).

REQUIRED PROFILE / SKILLS

- **Bachelor's degree (BAC+3)**, Master's preferred (BAC+5)
- **Maximum 2-3 years of relevant experience** in instrumentation and/or biochemical reagents.
- Good understanding of relevant **regulatory norms**, ie. ISO9001, ISO13485, ISO62304, IEC61010, CE Label
- (Desired) Familiarity with **design processes** and techniques (5 Why's or other six-sigma tools)

WHY ABBELIGHT / WHAT WE OFFER

TEAM A passionate, multidisciplinary, multicultural and quickly growing team, based just outside of Paris.

STABILITY Permanent position (CDI) with health benefits, and the French work-life balance.

EVOLUTION Your role is flexible and can evolve in multiple directions as the company grows. Early on you may assume managerial responsibilities to train and integrate more junior team members.

HOW TO APPLY

Send your CV and a brief explanation of *why this job is a good fit for you* to cbutler@abbelight.com.

WHO WE ARE / ABOUT ABBELIGHT

Founded in 2016, abbelight is a fast-growing start-up specialized in super-resolution fluorescence microscopy, specifically Single Molecule Localization Microscopy (SMLM). The technology developed by abbelight is based on three areas of expertise: chemistry, optics and computer science. The products developed integrate a constantly evolving know-how and allow abbelight to offer a complete solution, from sample preparation to data analysis, including modular instrumentation that can be adapted to customers' needs.
